Hunting & Gathering

Cavemen hunted animals such as prehistoric deer. The girls picked berries and herbs whilst the boys went hunting.

Tools

Spears and boulders were used to knock down and kill prey. Also arrows made of wood and flint were used. The Cavemen used sharp stones to carve, cut and slice animal bones, skin and flesh.

Art

Hand prints have been found on cave walls. Cavemen used natural colours made from mud, plants and sand. Blood was one of the paints cavemen used. Animals from hunts have been drawn on cave walls.

Clothing

Cavemen wore animal skins to keep them warm. The skins were used to make tents and shelters too.

Prehistoric Animals

Most of the animals were like modern day animals. They were different to some animals around today but were similar in some ways too. Some of the relatives of modern animals are rhino, deer, hyena, elephant and horses.
